PROJECT FACTS

Job No: TCL-1283

Project Name: Jubilee Street

Client: Mesari Ltd

Location: Whitechapel, E1 3EB, London

Project Type: New Build-05 storey + Basement

No. of Units: 09 Residential & 02 Commercial

Project Value: £ 2 Million

Contract Type: JCT D&B

Duration: 16 Months

PROJECT BRIEF

This multistorey (Design & Build) project is near the Royal London Hospital Whitechapel. Works includes demolition of an existing building including basement and construction of nine (09) apartments for private sale spread over the ground, first, second, third and fourth floors. In addition, part of the ground and full basement area was finished to shell standard for fitting out as a commercial space.

The adjacent neighbouring wall was underpinned and existing basement walls were removed in steps along with the construction of new RCC retaining walls steps. Structural steel frame supported on RCC ground floor slab, rest of the floors constructed as composite floor system with concrete and 150mm metal rib deck. External walls build-up of 310mm cavity wall with 100mm brick to outer leaf and 100mm concrete block to the inner leaf.

With very tight space and restricted logistics to erect a massive steel structure was a great challenge, successfully met through the hard work of the entire operations team within a short period of time. Good quality brickwork is the landmark of this Project.

PROJECT TEAM

Client:
Mesari Ltd

Principal Contractor:
Technocrates Construction Limited (TCL)

Project Manager:
Mr Faruk Ahammed (TCL)

Quantity Surveyor:
P2M UK Ltd.

Architect & Principal Designer
Studio V Architects Ltd.

Structural Engineer:
Martin Redstone Associates Ltd.
